

Helping young people build brighter futures

Learning support. Life skills development. Community enrichment.

Who we are

Youth Opportunities South Africa is a youth development organisation working alongside young people, schools and families in Soweto. We believe the circumstances a young person is born into should not determine the future they can build.

What we do

Learning Support

Tutoring, curriculum coaching, literacy activities, digital training and subject and career guidance.

Life Skills Development

Mentoring, sports, creative activities, public speaking and computer skills, with psychosocial support, counselling and reproductive health education.

Community Enrichment

Parent and educator training, work-readiness activities, family support, nutrition and community group work.

Our impact: recorded outcomes in participating schools

100 to 3

recorded teenage pregnancies, five focus schools, 2022 to 2025

101 to 13

recorded substance-use cases (scholars found using or under the influence on school premises), same schools and period

76% - 92%

matric pass rates across the five focus schools, 2025

162

university acceptances recorded, 2020 to 2024 (not necessarily unique students)

Source: YOSA introduction, June 2026. Recorded outcomes in participating schools; figures await YOSA confirmation of definitions before publication.

Success stories

[Success stories to be added once YOSA supplies verified details, approved quotations and consented photographs.]

Our vision

Our vision is to help young people become positive change ambassadors in their communities. We aim to strengthen, document and scale YOSA's model so that more schools, communities and, over time, partner charities can adapt it and extend its impact.

How your organisation can help

Fund a programme or school

Learning, psychosocial services, digital labs or capacity to reach another school.

Share skills and time

Youth speakers, mentors, career guidance, digital training or professional support.

Help with transport

Vehicles, qualified drivers, transport services, fuel or maintenance.

Provide technology and resources

Computers, connectivity, equipment or supplies based on confirmed needs.

Create pathways into work

Internships, work experience and employment for suitable participants and alumni.

Build awareness

Introduce YOSA to networks, share approved stories, explore employee fundraising.

Start a partnership conversation

Whether your organisation can contribute funding, skills, technology, transport or pathways into work, we would welcome a conversation about what we could achieve together.
